URGENT TRAINING COURSES ANNOUNCEMENT

CORONAVIRUS COVID-19

Thursday, 19th March 2020

Dear Valued Industry Member,

In-light of the COVID19 virus update received from the President of the Republic of South Africa, Cyril Ramaphosa, certain precautionary measures have been put into place to safeguard the health of the association's staff as well as those visiting our premises in Kya Sand.

Please be advised that the Liquefied Petroleum Gas Safety Association has suspended with immediate effect all Training Courses until further notice. This suspension will include any visitors to our premises in Kya Sand.

Once we have a clearer indication from Government and the Department of Health, on the Corona Virus outbreak, we will communicate the way forward.

In instances of mandatory training, the training department will liaise with the registration body in order to extend the validity of your registration (where possible) for up to an additional 6 months given the current COVID-19 crisis. Please engage with the Training department (Puleng Mokalake) or Registrations department (Joy Matabane) with regards to extensions. No automatic extension will be granted. This will need to be done as a written request and a declaration letter provided by LPGSASA for the Installer to complete.

You are advised to follow our social media platforms or check our website for any further updates with regards to this. The details of which are below.

Please contact our team directly should you require any clarity on the above.

Thank You for your understanding and co-operation in this regard.

Kind Regards,

Liquefied Petroleum Gas Safety Association of Southern Africa
