

LPG Day

1 DAY TO GO!

06 June 2024

In the lead up to LPG Day, a 7-day countdown campaign has unfolded across our social media platforms, showcasing a series of videos highlighting the benefits of Liquefied Petroleum Gas (LPG). Each day, a new video has been posted, focusing on different aspects of the benefits of LPG. From its role in providing clean and efficient energy for cooking and heating, to its significance in reducing greenhouse gas emissions, the videos emphasise LPG's contribution to a more sustainable future.

This series not only educates the public on the practical benefits of LPG but also builds excitement and awareness leading up to the global celebration of LPG Day.

HEALTH

LPG is a clean burning fuel that provides smoke free indoor cooking and can also help reduce outdoor and urban air pollution.

VERY LOW POLLUTANT EMISSIONS

FROM ILLNESS ATTRIBUTABLE TO HOUSEHOLD AIR POLLUTION FROM COOKING WITH SOLID FUELS

CLIMATE

Using LPG produces less CO₂ than coal, heating oil or petrol, emits virtually no black carbon or other particulates and is as clean as natural gas.

OFTEN LOWEST COST PER KWh TRAVELLED compared to diesel and petrol

DRIVING ON AUTOGAS LEADS TO A REDUCTION OF 10-12% IN CO₂ EMISSIONS AS COMPARED TO PETROL

ECONOMIC GROWTH & SOCIAL PROGRESS

LPG is a driver for economic growth, especially in rural areas and developing countries

GENDER INEQUALITY In many countries, women spend 4.5 hours each day collecting firewood and 4 hours are spent cooking.

RESOURCE EFFICIENCY

The majority of LPG produced is a co-product of natural gas and oil extraction and thus inherently resource efficient. LPG also plays a major role in reducing deforestation and desertification.

NO RISK OF SPILLAGE LPG is nontoxic and therefore not harmful to humans or the environment if spilled or leaked

LPG CAN BE TRANSPORTED USING SEA TRANSPORT, RAIL TRANSPORT, ROAD TRANSPORT

EFFICIENCY

A billion people and businesses across the world count on LPG because it provides instant, reliable, constant and transportable energy.

LPG can act as a 'BRIDGING' FUEL FOR NATURAL GAS

LPG HAS THOUSANDS OF USES

ENERGY FUTURE

LPG is a key component of a sustainable energy future in cities and rural areas both in developed and developing countries.

WELL-SUITED FOR REMOTE LOCATIONS with limited renewable options

LPG IS THE ONLY SUSTAINABLE ENERGY OPTION
