Just searching the internet to start learning 19:17 ✓

You

When I do my research I find Gas Heaters/Geysers and I'm not sure whether they're the same

There are different ones the forced fan ones that are much more reliable then these batteries operated ones but also more expensive but you will be rest assured that it will last a very very long time, atleast 20yrs maybe more

Daniel Gas Installation

There are different ones the forced fan ones that are much more reliable then these batteries operated ones but also more expensive but you will be rest assured that it will last a very very long time, atleast ...

That's what I lke to hear

19:18 ✓

So my personal favorite is paloma 20L gas geysers please look it up and tell me what you think 19:18

20l/min Paloma Gas Geysers

The 20 l/min Paloma LPG or natural gas geysers is economical and efficient and perfect for the South African environment. Serving 1-2 bathrooms and 1 kitchen
palomagas.co.za

19:18

I actually bumped into it today and sent them an email 19:18 ✓

The only thing that I'm worried about with them is the "borehole water that voids warranty" 19:19 ✓

I don't have borehole year but hoping that in 3 months I get it 19:21 ✓

Hi Daniel. I just realised I never listened to this message 15:05 ✓

Please proceed with doing a quotation for me for the 20L installation of the Paloma Gas Geyser 15:06 ✓

Thank you. My details are:

Morena Balatseng
3B Lange Avenue
Quellerina
Florida Glen
1709

Email address: morenabalatseng@yahoo.com 15:28 ✓

Oh yes I see so do you want the solar geyser to feed to the gas geyser or do you want to disconnect

Oh yes I see so do you want the solar geyser to feed to the gas geyser or do you want to disconnect the solar geyser? 15:59

I think feeding into the gas geyser is ideal 16:01 ✓

Yes it would be so it will only compensate for heat loss and not just use gas as the alternative 16:14

Glorious. That's what I'm looking for 16:16 ✓

18/05/2025

Hi Morena sorry I haven't had a chance to do the quote but you looking at about R23500 for the whole installation including the generator I'm not sure if you mentioned a stove but if you want to connect a gas stove as well it will be R1400 extra on top 11:21

Hi Daniel 12:34 ✓

Daniel Gas Installation

Thank you. Is this for this one? 12:35 ✓

The gas stove we'll do later 12:36 ✓

Please also give me the quote without connecting the generator 12:36 ✓

You

Thank you. Is this for this one?

Yes definitely 15:11

So that will be R22000 15:11

Hi Morena this is the install for the geyser and the generator 👍 18:18

29/05/2025

Hi Daniel. Received. Things have been hectic on my side 21:04 ✓✓

I will let you know when we can begin 21:04 ✓✓

Hi Morena, not a problem at all I'm waiting 👍 21:24

01/06/2025

Good morning Daniel 08:45 ✓✓

Which size Gas cylinder must I buy taking into account that I will also be looking to install a gas stove in the future? 08:46 ✓✓

I might even do everything at one go but I will let you know 08:46 ✓✓

You

Which size Gas cylinder must I buy taking into account that I will also be looking to install a gas stove in the future?

You need a 48kg but at a later stage get another one so you have one on standby 09:13

You need a 48kg but at a later stage get another one so you have one on standby

09:13

You

I might even do everything at one go but I will let you know

That sounds like a good plan

09:13

Thank you. I will start the process. I have been approved by Afrox and they have an office in Roodepoort

In the meantime, please give me a figure for just the generator installation together with the gas installation. I understand that separating the services does not mean that invoices for them separately will be the same as this quote. I just want to see what I can start with while money is still not available for the entire project

09:22 ✓

Please confirm the size of the stove top for me. I remember along the lines of 90 cm

17:03 ✓

I think we would do this first

17:04 ✓

I think it was 90cm yes, no problem.

21:49

03/06/2025

NOT YET SHIPPED

Defly DHG128 90cm Gemini Gas Hob w/ Twin Flame Wok - Black Glass

R 5,799 Qty: 1

Hi Daniel. A reminder to not forget the quote. The electrician will only be installing the generator on Thursday so we still have a bit of time but I need to make sure that I have the money ready 18:53 ✓

09/06/2025

Hi Daniel 12:03 ✓

Johan just left here. He started with oil and petrol then the generator started but he switched it off immediately saying that something's broken (probably a bearing according to him) 12:04 ✓

He says the manual does state that the oil and petroleum must be put in first, started and then switch to gas once it's running 12:05 ✓
